PROFESSIONAL SUMMARY

Full-Stack & Data Engineer | B.Tech in Electrical & Computer Engineering. Experienced in engineering end-to-end data pipelines, building responsive web applications, and deploying machine learning solutions to cloud environments. Skilled in Python, JavaScript (ES6+), React, SQL, and AWS.

EDUCATION

B.Tech in Electrical and Computer Engineering (AKTU)	ABES Engineering College	**Sep 2023 June 2027**	**CGPA-8.17**
Class 12th (ISC)	Modern Academy Senior Secondary School	**2022**	**82.40%**
Class 10th (ICSE)	Modern Academy Senior Secondary School	**2020**	**76.80%**

WORK EXPERIENCE

Web Development Intern | GrayIndiaConsulting Private Limited | June 2026 – July 2026

- Contributed to full-stack web development initiatives, implementing interactive application features and optimizing user interface workflows.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), HTML5, CSS3, SQL, C, C++, Java, R
- **Full-Stack & Web Dev:** React, Redux Toolkit, Zustand, Node.js, Express, Tailwind CSS, REST APIs, Custom Auth
- **Machine Learning & AI:** Regression, Classification (KNN, SVM), Clustering, Deep Learning (ANN, CNN, NLP), TensorFlow, PyTorch
- **Databases & ORMs:** PostgreSQL, MySQL, NeonDB, Mongoose, Prisma, Drizzle, BigQuery, SQL Server
- **BI & Data Analytics:** Power BI, Tableau, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Cloud & DevOps:** AWS (EC2, Elastic Beanstalk), Docker, Git, Custom VPS Deployment, Azure, Snowflake

PROJECTS

Personal Portfolio & Showcase Engine (HTML5, Tailwind CSS, JavaScript, Particles.js)

- Architected and deployed a modern, responsive personal portfolio utilizing Tailwind CSS and dynamic Bento grid layouts to showcase full-stack and data projects.
- Integrated interactive canvas animations (particles.js) and customized dark-mode UI systems for high performance and visual engagement.

Algerian Forest Fire Predictor (Python, Flask, AWS Elastic Beanstalk)

- Architected a predictive Flask web application utilizing Ridge Regression to forecast the Fire Weather Index (FWI) based on meteorological data.
- Deployed the responsive full-stack application on AWS Elastic Beanstalk to ensure high availability and automated scaling.

Sentinel-AI: Real-Time Fraud Mitigation Engine (Python, AWS, Docker)

- Engineered a cost-sensitive logistic regression model for highly imbalanced (98:2) financial data, achieving a 35% increase in sensitivity and ~90% fraud recall.
- Deployed the serialized model on AWS EC2 using Docker to provide a scalable, real-time transaction scoring endpoint.

E-commerce Sales Analysis Dashboard (Power BI, DAX)

- Architected a Power BI dashboard utilizing Power Query and advanced DAX to enable dynamic period-over-period comparisons of e-commerce performance.
- Analyzed $122M in sales data, uncovering a 10% profit margin and identifying top electronic revenue drivers to evaluate marketing ROI.

CERTIFICATES

- **Complete Web Development Course (100 Hours) – Hitesh Choudhary** (Udemy)
- **Complete Data Science, Machine Learning, DL, NLP Bootcamp** (Udemy)
- **Complete Data Analyst Bootcamp from Basics to Advanced** (Udemy)
- **The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert** (Udemy)
- **Python** (CISCO)

ACHIEVEMENT

- **Achieved Finalist position** in **Hackamania Hackathon (Microsoft Azure Supported),** The Elites, 2025
- **Selected as Finalist** in **Hack Genesis 125 (International Hackathon)**, CHRIST University, 2025

EXTRACURRICULAR / INTERESTS

- Design: Used Canva and Figma to create visual templates and promotional content for student club engagement.
- Creative Outlets: Sketching, painting, guitar, and poetry writing.
